

Shower Aids

The tub transfer bench allows users to get in and out of the tub without having to step over a tub ledge. This can be helpful for people who are unable to lift their leg over the side of the tub, those with balance problems that make it harder to lift their leg over the tub, and those who are unable to stand for the full length of a shower.

The shower chair is a seat that can be placed in a bathtub or shower. It allows the user to sit for the duration of their shower. It is useful to people with mobility or balance problems and those who are unable to stand for long periods of time.
