Howard County would like to express its gratitude to all of the companies that volunteered their time to report the number of recyclable tons that they generated in Howard County during calendar year 2013. Recyclables generated by Howard County businesses include paper, cardboard, glass and plastic containers, electronics, food scraps, yard trim, lead acid batteries, tires, appliances, metal, textiles, etc. The success of Howard County's recycling program is dependent on the cooperation of both residents and businesses. If you do not see your company's name here and would like to learn more about how you can recycle and also reduce your waste, please contact the Howard County Recycling Division at 410-313-6444 or email us at [help@howardcountyclecycling.org](mailto:help@howardcountyclecycling.org).
