Legend

- ▲ Frequent Flooding Area
- Road
- 100 Year Floodplain
- Reservoir and Major Streams
- Streams

The County has compiled this map and list of roadways that cross streams, which are the most frequently flooded based on incidents reported citizens and County staff. This list is periodically reviewed and updated if needed. A location being on the list does not mean that it will flood in every rain event nor is it an exhaustive list of every roadway that could flood during a large storm event. If you approach a roadway with standing or flowing water, do not attempt to drive through the water. **Turn Around. Don't Drown.**
