Material Selection Committee Submittal and Review Process May 23, 2016

The Approved Materials List exists to expedite construction in Howard County by identifying the products that are approved for use on site construction projects throughout the County. The Approved Materials List is not intended to be an exhaustive list of all materials acceptable for use in road, utility, and storm water management new construction. Vendors and manufacturers are added to the List after their petition is reviewed and approved by the Material Selection Committee. Construction materials that are included on the list are for use throughout the Howard County. Construction materials with limited applications or conditional approval are more appropriately approved on a case-by-case basis per project. The Project Manager presides over such approvals on a given Capital Project. Developer Projects may seek a Waiver of Design Standards through the Department of Planning and Zoning during the design review process. Products designed for installation by maintenance crews instead of new construction should be directed to the Bureau of Utilities or the Bureau of Highways as appropriate.

Please send all petitions and samples for the Material Selection Committee review/approval to:

Material Selection Committee Chairman
John Seefried P.E. – Chief, Construction Inspection Division
9250 Bendix Road
Columbia, MD 21045

The Chairman of the Material Selection Committee reviews the submittals for completeness and distributes the materials for consideration by the appropriate Public Works Staff. The Material Selection Committee convenes as work schedules allow. The Committee will approve, deny or table the petitions. A written response will be provided to the applicant from the Committee Chairman. Petitions for inclusion on the List shall be as described below.

Petitions shall include seven hardcopies of:

- A) A concise description of the material along with the manufacture's specifications, photographs or sketches of the material, and the installation procedures. Where multiple materials are shown on various literature, please highlight the material pertaining to the specific submittal.
- B) Show the reference, description, manufacturer, and model number as you desire it to be shown on the Approved Materials List. The last page of the current approved list is left blank for your convenience in populating the list.

	Reference	Product Description	Manufacturer	Model Number (Details)
<i>example A</i>	905.01	PVC Pipe for Roadway Projects	XYZ Inc.	Sure Drain 4"-18" Diameter Pipe
<i>example B</i>	905.01	PVC Perforated Underdrain	XYZ Inc.	Underdrain 6000 3"-6" Diameter Pipe

C) Written certification that the material "complies completely" with all published Howard County specifications, details, and design guidelines. The certification shall call-out the Howard County Details and/or Specifications that apply and document how these standards have been met. The Design Manuals are posted on the Howard County, Public Works Department, Bureau of Engineering web page. http://www.howardcountymd.us/DPW/Engineering_Homepage.htm If the material, as proposed, deviates in any way from Howard County Standards, the specific exception must be documented in the petition.

example A - Sure Drain PVC Pipe for Roadway Projects in nominal pipe diameters of 4, 6, 8, 12 & 18 inches completely complies with the Howard County Volume IV Specification 905.01.01 and associated SHA Standards. Attached is a certified study by the University of Wisconsin dated 3/12/2012 showing that Sure Drain meets or exceeds the requirements of AASHTO M304 and ASTM D3034. Please note that the attached study was performed under ASTM D3035 criteria which is more stringent in requiring 2000lb loading vs. 1000lb loading under ASTM D3034.

The certification shall be signed by official officer within the company.

D) Testimonials, references or contact information for other local jurisdictions that have approved the use of the materials (For example - Baltimore City, Baltimore County, Anne Arundel County, Maryland State Highway Administration, MDE, WSSC, etc.)

Additional Requirements:

E) If applicable, manufacturer field installation guide line shall be submitted that explains proper way of storing, installation and testing in the field.

F) In cases where the material requires structural design, three copies (in addition to the seven copies in the petition) of the engineering computations and drawings wet sealed and signed by a Professional Engineer registered in the State of Maryland shall also accompany the submittal.

G) In cases where field testing is needed by Howard County, the County will request samples and set a schedule for evaluating and analyzing the performance of the material.

Submittals of complete petitions are required prior to consideration by the Material Selection Committee. Applicants will be notified in writing by the Material Selection Committee Chairman about the decisions of the Committee.
