

Pumpkin Chunkin' Competition 2016

Sunday, Nov 6 from 2 - 4 PM

Get a team together, and compete in the Pumpkin' Chunkin' Competition!

How it works: Students use math, physics and engineering principals to design a mechanical launch system (no explosives allowed) that accurately fires a basketball-sized pumpkin towards a far-range target. Teams compete for prizes and glory! Mentors and project funds available for the first 10 teams to register. Registration info coming soon!

To check out results from last year's competition and the 2016 rules and curriculum, go to:
